

EUSEBIO SRL FW 23/24 collection

EUSEBIO Srl presents the new fabric collection for the next 23/24 fall/winter season. We'll attend the following international shows:

VIEW MUNICH (collection preview) 21 - 22 JUNE 2022

PREMIERE VISION PARIS 5 - 7 JULY 2022

MILANO UNICA 12 - 14 JULY 2022

MARE DI MODA MIAMI (beachwear preview) 17 - 19 JULY 2022

MUNICH FABRIC START 30 AUGUST - 1 SEPTEMBER 2022

The new FW23/24 collection is composed by knitted fabrics for ready-to-wear, sportswear and beachwear, 100% Made in Italy in our production departments.

The most important part of the collection is presented by casual-wear. A lot of fleeces with different hand-touch: very soft and smooth, raw and stiff. Brushed fleeces for the cold season.

Jersey, chenille, double piece dyed and yarn dyed made with natural fibers (Tencel by Lenzing, Viscose by Ecovero and Supima cotton).

We also present our must-have bonded fabrics, made with natural fibers and also synthetic fibers for active and technic wear.

Like the previous collections, there is the group of bases for printing in 100% cotton. This year there are new items such as double, piece-dyed chenille and piece-dyed sweatshirts, digitally printed with the possibility of customizing the designs. Also for this year a DIGITAL BOOK is available where you can view all our proposal for designs.

As for all seasons, we remind you that EUSEBIO SRL is stressing since years the theme of responsibility and sustainability. We are **GOTS (Global Organic Textile Standard)** certified from January 2022 and we are members of the Better Cotton Initiative (BCI) platform to promote and support a better cotton production chain. In the collection there are fabrics made with recycled poliammide pre-consumer and recycled polyester from plastic bottles.
