

Crugnola di Mornago, January 2022

EUSEBIO SRL – SS23 collection

EUSEBIO Srl presents the new spring/summer 2023 fabric collection. We'll attend some of the textile fairs:

MILANO UNICA 1-2 FEBRUARY 2022

PREMIERE VISION PARIS 8-9-10 FEBRUARY 2022

LA TEXTILE 23-24-25 FEBRUARY 2022

The new collection is composed by knitted fabrics for womenswear, menswear, streetwear and sportswear. We propose a huge selection of frenchterries/**fleeces**: cotton, cotton+elastan, polyammide and polyester. All the articles are presented in different finishing and hand touch feeling. Must have of the collection are 100% cotton jersey, cotton and elastan jersey and Supima cotton jersey.

For the womenswear fabric selection, we present two type of article group. The first one is composed by double knitted fabrics, jersey, fleece and sponges realized with natural cellulosic fibers such as Tencel and Ecovero by Lenzing, MicroModal and Modal, Naia. In the second group there are technical and performative knitted fabrics, realized with recycled polyester or recycled polyammide.

For the Spring/Summer season, we focus also on fabrics as printed qualities (digital printing and rotative printing). Double, jersey, frenchterries, interlock are some of the articles presented as printed quality. As usual, we give the possibility to personalize the digital printing with own design or choosing from our big archive.

Big news: from January 2022 **EUSEBIO Srl is GOTS (Global Organic Textile Standard) certified.**
